The screenshot displays the ATF WebPortal interface for a user named Mr Terry Breslin. The page title is "Assigned courses for Mr Terry Breslin". On the left, there is a navigation menu with options: Home Administration, User Menu, Office Courses, View Courses, User Help, User Help, and Logout. The main content area lists three courses:

- Corporate Manslaughter**: Understanding the new Act. This course is aimed at people with strategic responsibilities for health & safety & prepare Senior Management for the new Corporate Manslaughter & Homicide legislation. Tutorial: Partially Completed, Test: Not Taken. Buttons: Refresh, Add your Details, View History, View Tutorial.
- OSR Life**: Display Screen Equipment Training. How to organise your work space to minimise the risk of injury and fatigue. Tutorial: Not Started, Test: Not Taken, Risk Assessment: 06 Mar 2010, Concerns Raised: 0. Buttons: View History, View Tutorial, Risk Assessment.
- First Aid**: First Aid at Work. A comprehensive course aimed at everyone. First Aid is the initial assistance or treatment given to someone who is injured or suddenly taken ill, this course describes the sequence of priorities for giving first aid, providing essential information on how to deal with emergencies, and how to look after yourself, it also covers the steps involved in assessing and treating a casualty: Chests; General Injuries; Burns, Scalds, Joints and Muscle Problems; Medical Conditions, and how to Attend Casualties, plus assessment paper based on various scenarios. Tutorial: Partially Completed, Test last taken: 14 Dec 2009, Score: 92%. Buttons: View History, View Tutorial.

ATF Solutions have been providing dynamic, engaging training content for many years. The effectiveness of these courses has been further enhanced by our dedicated e-learning environments: **ATF webPortal** (for Internet delivery) Fully hosted on our secure dedicated servers, or **ATF iPortal** our latest addition to our training arsenal to help you provide health and safety training to your staff in a cost-effective manner via your corporate Intranet.

ATF WebPortal or iPortal combines a straightforward user interface with powerful administrator features to offer unparalleled functionality. We recognise the importance of trackable, measurable training and both new platforms will provide you with ALL the tools to make this a reality.

Each trainee logs in to their own password-protected account, which details their entire training portfolio together with their training history for each course. Any module can be launched with a single click.

Courses can be assigned to any organisational group (department/location/region etc) or on an individual basis. Customisable training reminders allow you to determine how often a course should be re-taken.

Auditing of training can be carried out at any level in the organisation, allowing line managers or department heads to take responsibility for the training of staff in their area.

ATF's new platforms offer a comprehensive set of powerful admin tools ensures that the implementation and management of health and safety training has never been simple and painless.
